

## Creating the JPEGger database for Microsoft SQL Server

1. SQL Server should be in mixed mode.
2. Create a database named JPEGger.
  - a. Both log and data files should automatically grow by 10% unlimited.
  - b. Should be in Full Recovery mode.
3. Create a SQL ID named Transact.
  - a. Make Transact db\_owner for the JPEGger database.
4. *(Optional)* Create a SQL ID named JPEGger.
  - a. Make JPEGger db\_datareader and db\_denyswriter for the JPEGger database.
5. Create maintenance plan(s) for the JPEGger database. See article
