Topaz Signature Pad
9/13/07 (Updated 07/10/2012)

1. SigPlusPro should be located at c:\dragon\setup\drivers\topaz, but it can also be downloaded from http://topazsystems.com/Software/download/sigplusactivex.htm
2. During the hardware install wizard select:
    a. T-L
    b. T-LBK766
    c. HSB
3. Transact Universal Driver (This can be downloaded from tranact.com)
    a. add device,
    b. pick TCP Port for sig pad, eg 3334
4. download and install: www.jpegger.com/SigConfig.sfx.exe (case sensitive)
5. run Sigconfig –
    a. add contract
        i. ID = 1 (only contract # supported by Scrap Dragon)
        ii. Name = your choice, eg. purchase
        iii. jpeggger field = receipt_nbr.
    b. add jpegger site, IP is jpegger – large yards can have multiple jpegger sites
    c. Update All
6. in Dragon, local options, peripherals
    a. check signature pad
    b. IP address is the computer where pad is attached, usually 127.0.0.1
    c. Port is the port # assigned to the sig pad in T, eg. 3334
